

# ON FIRE! HOTLIST

## Fast growing demand and short supply mean sales opportunities for you!

This hotlist goes beyond the obvious big sellers. This is your inside scoop on the opportunity you might otherwise miss. We look for those hidden pockets of high—and fast growing—demand, coupled with short supply. If sales over the past two months grew faster than supply, and notably faster than the rest of the category, it's Hot.

Hot last year uses the same calculation, based on sales and demand in July 2012, for insight into seasonal trends and opportunities.

## Lifestyle

For the Lifestyle categories, we look for brands where demand and conversion is high compared to the top ten selling brands in each category each month, and inventory on eBay is light. Product experts then examine trends and suggest which styles and colors may be popular within that brand.
